LITE Series

The new **LITE Series** by PROEL is an extended range of **active and passive speaker systems** with lightweight plywood cabinets offering the renowned PROEL sound and a high-level performance in a reliable and affordable package.

Powered by **extremely lightweight bi-amp modules** with Switch Mode Power Supply and sophisticated **analog processing** and featuring **selected drivers** and wide-dispersion horns, the seven different active models are suitable for a wide range of **portable setups**, from live acts, dj sets or P.A. systems.

Thanks to the built-in flying points and to the **complete range of accessories**, the passive versions offer the ideal solution for **small to medium-scale permanent installations** and provide a sound reproduction faithful to the source and a linear phase response.
